condition of affairs is very peculiar here at present. When the Legislature met the universal expectation was that the militis would be called out and a disastrons civil war follow. Brownlow's enessage strengthened the belief, and the radical leaders in both branches of the General Assembly breathed ont their wrath y wholesale.

It was known that instructions had been sent from Washington to carry the State for Grant at all hazards, but the conciliatory course of the Confederate Generals. who have been in session here for the past two days has entirely changed the programme. The frank declaration of such men as Forrest and Cheatham, and their pledges that the restless portion of the ranchised should be held in check for the sake of peace, left the radicals no ex-

cuse to precipitate a collision. They therefore changed their plan, and now give out that Brownlow will submit a message in a day or two to open np Should the Legislature take any action, it amendment to the Constitution, which would be enhanted to the legalized voters

considered as an interference in political affairs.

A general agricultural report of the condition of the harvest on the continent says the barvest in the south of France is terminated. Fears which had generally prevailed have been dissipated, and the result is better than was expected. The crop, which in certain localities was empposed to be in jeopardy, will be abundant. At Angiers reaping is going on everywhere, and the farmers seem to be well satisfied. The yield will be large, although the quality leaves something to be desired. At Monthiery the sickles are also in the corn and the crop will be good. Letters from Normandy give great hopes, and in some points the produce will be above the average.

A statue in the market place and a memorial window in Abbey church at Rumsey, were inaugurated on the 21st.

A serious riot recently occurred at Trieste, but was suppressed by the military. One person was killed and another wornded. n November on the same day of the In this way the radicals count on peaceally securing the practical withdrawal of the Democratic electoral ticket. Gen. Prim has disappeared from London, and has probably gone to Lisbon, where all the military men of the progressive party who recently had to leave Spain are proceeding. The friends of the Spanish Government were becoming alarmed, and a state of siege will probably be proclaimed shortly. The belief was prevalent that the present Portuguese Ministry is in favor of a revolution in Spain. ench a result will not be reached, and that their game of carrying the State for Grant by hoodwinking the rebels will be necessful but the indications now are that most of the present voters are really willing to have the franchise extended. So you may reasonably anticipate an im-CANADA. ant change in the political status of the disfranchised within the next few

The Gert Market in India.—The native writer of a letter in the Shome Prokach, one of the leading native papers in India, gives the editor an account of a sale of girls near Calcutta at which he was present. When he first heard that such a sale was going on, he could scarcely believe he was living under the British Government; however, he found that he had heen hut too correctly informed, for on going to a certain quarter of the oazan at Manickgunge, he saw a cluster of girls, of from 2 to 13 years of age, standing up for sale. The brokers were very busy summoning customers, as they received a commission of 10 per cent on all the hargains effected through their instrumentality, hesides some trifling offerings. The prices varied according to the age and beanty of the children, girls of seven ruled at about 400 rupces, an old man of 70 whispered an offer of 750 rupces for a very beautiful girl of 13, who was surrounded by quite a crowd of bidders. An exchange of daughters was taking place in another part of the bazaar. Tit: Russian to Bornara.—Dispatches have been received in London stating that the official Russian journal at St. Petersburg annonneed, on the authority of private letters, that a treaty of peace was about to be signed between the Emir of Bokkara and the commander of the army of the Czar. The steady progress and great power of the Russian army, it is asserted, had alarmed the Emir, who had also the desertion of his subjects to contend against, who were emigrating toward the frontiers of Western China. On the other hand, the Russian soldiers have been terribly harassed by Sadyk an independent chief of the Kerghiz steppes. It is, therefore, considered highly probable that the combatants have agreed upon a peace that will be advantageous to both. Potsonous HAIR Dy is.—There is a class it hair dyes of an objectionable characer, which is being extensively used in al of hair dyes of an objectionante character, which is being extensively used in all patts of the country. The dye is prepared from acetate of lead, Inc sulphur, rore water, and glycerine. The lead salt constitutes the objectionable feature of the compound, and several cases of lead poisoning have been reported from its employment. A serious case has recently come to our knowledge, in which a lady has become perfectly prostrated from its effects. All the violent and distressing symptoms of led poisoning are apparent, and which are directly traceable to the use of this dye. There are thirty or mors different makers of the article throughout the country, and as many different names given to it. It may be known by the heavy sediment which is usually present in the bottles, and which requires to be shaken up with the liquid portion hefore using. A large number of people are so extremely sensitive to the action of lead upon the system, that they suffer whenever it is brought in contact with the person.—Journatof Chemistry.

NASHVILLE, August I, 1868.
Since the date of my last letter, Tennone & Middle Tennessee especially— has suffered a most terrible anxiety. We for riveting our chains closer, and under no circumstances come to an outbreak or have a collision of races. Although the bave had every reason to believe that we were upon the brink of a olvil war. The falling together of the Legislature by Brownlow, for the purpose of putting his militia into the field to externmente the Eukiux, was well calculated to alarm all thinking men. You know what it is made up of the moot miserable set of wretches that ever handled a musket or plundered a hear-roost Some of them have been pardoned ont of the peniteritary, and will break into that institution regain the first opportunity they find. To arm these creatures and scatter them them and the people. I am glad to say that the Legislature is alive to this fact, and is likely to disregard the recommendations of Brownlow, so far as a call for the militia is concerned.

Knklux Klans in our State is the merest boah. Every negro who becomes impertinent and is slapped over by a white man, is heralded abroad by the radical paper here as a victim of the rebel Knkluz. Every "loyal citizen" who, following the natural bent of his genius breaks into somebody's amoke-house and is roughly handled by that somebody, is represented as "a quiet, peaceable, unefiending citizen, who has been set upon by the rebels and nearly beaten to death for no other earthly reason than that he thevoted to the Union." This has been the constant cry for the last three years. And yet not a solltary man, woman, or chird has ever been molested on account of his or her political sentiments. Erownlow knows this as well as he knows snything, but he has been instructed from Washington that he can greatly subserve the cause of Grant and Colfex by "insugurating hell in Tenwhat with the printing bill being rushed through the Assembly when twelve personant, it is faith. Soma of tha wisest and most infinential men of the State have entered their solemn protest State have entered their aclean protest against the fool-hardy action of Brownlow. These protests you have seen in the Nashville papers. Radicalism in the North has been taught to believe that the "rebels" are at the bottom of all the disturbances in the State; and yet, if we are naved from the civil war which Brownlow seeks to precipitate upon us, we shall be indebted in a great degree for our angley to such men as Gen. Cheatham, Gen. Stewart, Gen. Brown, Gen. Forrest, and others who are chief among the "rebels."

Fortnate y, a majority of the mean-been of that body have the mailliness to recist his appeal for the turning loose of the militia. At least, it is believed that such is the case. And they know that the people. And they know benegrated at the Vertelles meeting was a that after the atruggle there would iscarcely be one left to tell the story of the fight.

Your readers beyond the Ohio may rest assured that if there should be a bloody strife in Tennessee it will not be brought about by the "rebels," who, as a general thing, are attending to their own husiness, and ask only to be let alone. As for the En-k'nx Klan, they are an or-

If it was wise—so says the popular common sense of the hour—to organize a periodic movement in Tennessee, cught that movement in Tennessee, cught that movement to be abandoned in the fact of the cuem?

Six months ago prudent man argued against the organization of a Democratic movement. They thought it best to plant ocrn, make money, and let Brownlow and his voting machine go to the devil. It is spike of this counsel a movement was beginn: a State Convention unet; a delegation to New York was appointed; an electronal ticket was chosen. Now, the very man who advised all this are proposing to back down and withdraw from the canvass. Will this not encourage Brownlew in his oppression? Whil it not belster him np with the idea that he has culy to show hie teeth in order to terrify Tennessee?

Safety now seems to lie in determined and confidence on one side, the other party to the solemn contract being actu-ated by the most mercenary and selfish purpose.

oly, A Few Remarks on Education

We think we are a greatly advan people, and, truly, we are in many respects. But we have our great faults, paramount among which is the carelesseness with which we treat the education of our children. In fact, in our present system of education, we have no children at all. Our offsprings pass from baby-bood directly into manhood and womsn-hood, being left entirely to educate them-telves, as far as moral character is concerned. The corruption of the male youth b the larger cities of this country is tru borrible, and the philanthropist ha ly normore, and the philanthropist has drily occasion to make observations which will fill him with serious appre-hensions as to the future of the growing generation. When we consider that the moral state of its individual members is moral state of its individual members is a tertain gauge of the morals of the State, we ought to reflect upon measures wilch will tend to slevate the moral capacity of our children. No country in the world presents so depiorable a pictura as our own. in none are the houses of correction f uthini offenders so large and so ed as they are here. The causa is simply that in no country the cultivation of the youth is so little watched as here. We have no compultory school system, that in the country the cultivation of the business correspondence.
